PENNSYLVANIA

Heroes Outdoor Therapy is currently focused on strengthening the veteran community in the state of Pennsylvania. Out of state, events are based on opportunity and funding.

ABOUT US

The founder, Leslie VanDerau, alongside cofounder Troy VanDerau, aim to help veterans cope better in life.

They are both USMC veterans that have served their time in the military and now they strive to help others cope with their difficulties in life.

Both passionate about the outdoors, they are committed to exposing and integrating the military community into various forms of 'Outdoor Therapy'.

OUR MISSION

At Heroes Outdoor Therapy, veterans and active-duty service members enjoy outdoor activities such as hunting, fishing, and countless others.

Heroes Outdoor Therapy believes in the power of the outdoors, and using nature as a form of distressing, healing, learning about oneself and reconnecting with the veteran community.

SAFE AND CONVENIENT

Each trip made has been planned, coordinated and funded to ensure the fun and safety of the participants. Aside from helping with every day related stressors, these outdoor activities are meant to serve as a healthy outlet for our veterans in handling other challenges that come with serving.
